

# Christian Fuller

## FULL-STACK WEB DEVELOPER

(660) 654-1183

cef2010@gmail.com

linkedin.com/in/ChristianEdwardFuller

## TECHNICAL SKILLS

### Languages:

Ruby, Rails, Javascript, React, HTML5, CSS3,  
[currently adding Elixir/Phoenix to the list]

### Web Tools/Concepts:

Restful APIs, SQL, AJAX , Flux, Git, TDD

## EXPERIENCE

### Co-Instructor, DevPoint Labs; Salt Lake City, UT

Nov 2015-Present

- I apply my knowledge of Ruby on Rails, Javascript, React, HTML & CSS, and other concepts presented in the DevPoint Labs Full-Stack program to solidify the concepts with students during lecture and projects.
- I have applied my history of management and organizational roles to help structure the curriculum and day-to-day flow of the programs at DevPoint Labs.
- I used my development skills to quickly build out utilities for use in the class:
  - Hackathon Scoring Ballot: [dpl-vote.herokuapp.com/](http://dpl-vote.herokuapp.com/)
  - Student Submission Decompressor: [github.com/eatspaint/assignment\\_decompressor](https://github.com/eatspaint/assignment_decompressor)

Admin: Will Liang, (801) 671-1823

### Contract Web Developer, Lolo, llc; Salt Lake City, UT

May 2016-Present

- I recently began work with Lolo, and am currently working on features for a legacy Rails application that they develop/maintain.
- My future work with the company will involve maintaining multiple Rails apps that comprise a large scale solution for music distribution and royalties management, as well as developing front end features in React.

### Software Dev Intern, Exposure Tracker; Salt Lake City, UT

Nov 2015-Feb 2016

- I worked on the development of Exposure Tracker App and side products for TrackTrain, a company specializing in managing training and safety records for professionals.
- My daily work work included:
  - Backend maintenance, primarily in Ruby
  - Building features for the front end with Javascript, HTML/CSS
  - Building a separate usage & analytics application - Elliott - from the ground up with React.

CTO: Dave Jungst, (801) 330-3963

## PROJECTS

### **Apollo**

[apolloapollo.io](http://apolloapollo.io) - [github.com/eatspaint/apollo](https://github.com/eatspaint/apollo)

- Concept came about after the realization that nobody is great at DJing in the office
- Allows users to access an office-wide Spotify "jukebox"
- Future direction includes "festivals" feature that allows users to generate multiple playlists based on artists performing at a festival by dropping the lineup into a generator

### **MarryMe**

[github.com/eatspaint/marry\\_me](https://github.com/eatspaint/marry_me)

- DevPoint Labs capstone project
- Built with different UX in mind for couples & vendors
- Involved hand-rolling a second set of authorizations for separate couple and vendor authentications

## EDUCATION

**DevPoint Labs**, Salt Lake City, UT – Full-Stack Ruby on Rails, Fall 2015

**University of Missouri**, Columbia, MO – Electrical Engineering, 2010-2012
